

Fig. S6. The human UDP-GlcA transporter does not complement *uut1*Δ. *uut1*Δ and WT strains transformed with vector alone (vector) or vector expressing His-tagged UGTrel7 were grown overnight at 30°C in YPD with G418, and 5 µl of serial dilutions (10-fold starting at 10⁶ cells per mL) were spotted and grown as indicated on medium containing G418. Images of the WT and *uut1*Δ strains were taken three and six days later as indicated.
